## Profile

---

A highly committed and motivated team-leader with experience in leading R&D teams from initial software design to production. In the past years I provided technical leadership to cross-functional development teams while tackling technical and personal challenges to provide high quality software on time.

## Experience

---

2018 - Present **R&D Team Leader @ AT&T**

Leading 2-3 teams at a time (Avg of 6 people each).

Responsible for defining timelines and ensuring team meets delivery and quality goals.

Creating technology roadmaps, working tightly with Product and Architects teams on a design of the solution architecture.

Working with the highest standards of code quality.

Responsible for employees growth and career paths. Interview, hire and train new associates.

Working on highly complex projects with large scale of end users and a high load of traffic. Delivering production grade software that is distributed and highly available.

2011-2018 **Senior FullStack Developer @ AT&T**

SW Developer working on highly complex systems for AT&T IoT platform.

Writing Server and Client side logic.

Working with MicroServices, dockers, RESTFUL APIs.

Leading demos in large expos like CES and in meetups.

Reviewing code and mentoring other team members.

2008-2012 **Java Developer @ Amdocs**

Development of Commercial sites and browser based applications.

Working with Java (Servlets, JSP), WebServices, HTML, JavaScript, jQuery.

Software installation and support on offshore customer sites. Performing code review for other team-mates.
